

LEPC Updates

7/27/2011

LEPC - Amy Manney, Chair:

1. Amy reported concerning the changes in hazardous chemicals that were reported this spring. She noted six chemical were removed, but six new chemicals were added. The good news is that, with each passing year, more and more agencies will file on-line.
2. NYS OEM did a nice overview presentation on LEPC - what they are, what they do, etc.
